The following pieces were generated in the afternoon
of November 21, 2023 at Leipzig University Library
with a 2017 Kaby Lake CPU. The SHA1 of the models used
are fe938a131f40 (llama2), 4280f7257e73 (falcon) and
1629f2a8a495 (zephyr). A human reviewed about 1000
snippets from six different models and choose the
following three for purely subjective reasons.

In your code
A single line can make you think
About all of the errors you might see.

                                                    falcon

Go, the language of grace
Compact, efficient, and fast
Code flows like water

                                                    llama2

compilation speed,
golang's strength in production,
developer's delight.

                                                    zephyr
